July Newsletter – Chair Report

Many of you will know our long-time member Ian Robinson. Sadly, we advise that Ian lost the "love of his life", his wife Cēnone on 13 June. Several members of our club attended the service for Cēnone and learned of a wonderful history of caring and love and a very eventful life.

During July we are able to replicate some of the extra sessions we had promised for April which of course did not eventuate. These include: The multiple benefits of using Wikipedia with Ian Handricks, the Card Group with Campbell Stanford, Real Me (see Tutor notes under Ask Me How) and Glen Plaistowe has revised her approach to our Travel Group. Meantime please notice that Bernice Hyde has suspended her Family Tree Maker sessions for June and July.

How good it has been to see our members back into our clubroom – we have various hand sanitisers and cleaning methods available for use and it seems that there is a desire to get on with our lives. At our June Genealogy Workshop we had attendance of 21 but whether this was a desire to socialise a little or the attraction of our two speakers Kate Ellis and Roger Willoughby I am not sure but thanks to all and in particular Kate and Roger.

Shirley Hansen, a former Nurse is in charge of running the cleaning roster and our Sunday Meeting food and drinks. Shirley has put extra precautions in place for the handling of food such as the use of tongs and the way in which the washing up is handled. Thanks to Shirley for her care of us all.

In this edition you will find details of our Annual General Meeting – please do come along and have your say by voting and do ask questions about club procedures. Included this time is a recommended change to our Constitution to clarify aspects of compliance with the Privacy Act. The formalities are not too tiresome and are compensated for by a grand morning tea.

A particular request – on page 4 you will see an item entitled **What can you do for Your Club?** – I would greatly appreciate it if you would stop and read the content – it is vitally important for the continuation of SeniorNet North Shore. Not everyone will be in a position to help but do please think about it.

Lois Kay

Advanced Windows : Bill Howell

This covers WinXP onwards to Win10 on the 1st and 3rd Tuesday mornings each month and features a lively discussion group.

You ask the questions and we all participate in trying to solve the problems.

If all else fails "AG"! The answer will be revealed to those who attend the sessions

Ask Me How : Toby Malcolm

Do you want to expand your understanding of technology? Do you want to know the meaning of some tech jargon? Come along to this ask anything session and submit your questions – whether it be about Windows, Macs, the internet, smartphones, tablets (Apple or Android), or some other topic. Each session will be different depending on the questions, so each month you can learn something new.

Special topic this month (30 minutes or so): RealMe is a New Zealand Government online login & identity verification system. You'll encounter RealMe when using various government and business services online, such as passport applications, accessing your IRD details, & local council services. In this session, we'll cover how you can register for RealMe & how you use it. The rest of the session will be open to general tech questions as usual.

Ask a Tutor : Barbara Anderson, Glen Plaistowe**MUST BOOK**

For this class, you will be booked with a tutor to help you solve your problem. One hour is sufficient for concentrated work. Bring with you :

Your device, plus power leads and mouse (remember to charge it beforehand).

A list of the problems you are having. The user name and passwords you need. If it is an Apple device you may need your passwords and your user name - also, if you are working on email you need that password. If it is Google you may need your Google Account or Microsoft Account for Microsoft. You may not need to use them but be a good scout and Be Prepared.

You will need paper and pen to record the steps you take so that you can fix it should it happen again.

If you have a PC or your laptop or device is too heavy for you to carry you will work on a Club computer.

You must book in with the Tutor in the week prior to the class as only 3 or 4 Tutors are available to help and they need time to prepare for your session.

Booking is essential so we know how many will be in the room. There will only be room for 4 perhaps 5 people to attend. Select the most important items that you need help with so that they can be dealt with as quickly as possible.

Card Group : Campbell Stanford**Must Book**

What a fun time cards can be! For raw beginners and card-sharps alike. We'll explore various relatively short, simple games like Euchre, Cribbage and 500. Great camaraderie and team spirit, as well as one-on-one games. Come and try it. Beats Solitaire any day! ☐
Email or ring Campbell

**1st Friday Genealogy : Barbara Anderson**

For this session we will have our treasures, followed by an account by Ian Fraser on an interesting relative. Also there is a request for an explanation of where FTM files, downloads and backups are and how to find backups and info easily and store new information. We will try our searching for people on set websites also, plus any other bits and pieces I find meantime.

Genealogy Workshop : Lois Kay

How fantastic we are all "normal" again and can meet up. New websites and ideas are constantly emerging and Ian Handricks has discovered a few gems that will help us with our searching and recording. Email me in advance if you have any special requests or if you have a great family story to share – we would love to hear about it. Everyone has at least one interesting family member.

iPad and iPhone : Ian Handricks

This forum is for anyone using Apple's iPad and/or iPhone. Ian will cover everything from first time iPad and iPhone users' problems, issues and knowledge right through to experienced users. He will talk about exciting developments, new apps, tips and tricks. You will learn how to manage and run your iPad/iPhone and at each session Ian will introduce new information on how the devices can be used effectively. A great opportunity to get answers to your questions.

Photobooks : Bernice Hyde

The main website we use is Kroma to create a photobook and now we can access with an iPad. and they have new seamless book options. So come along and join our group for some tips and tricks.

Marion's Tips**How to Quickly Delete Old Facebook Posts**

Now more than ever, it's important to curate what pops up on your social media feeds. Here's how to delete Facebook posts from your Timeline one by one or in bulk.

<https://au.pcmag.com/how-to/58612/how-to-quickly-delete-old-facebook-posts>

Photography : Rex Oddy

Photography tutorials will include practical instruction on aspects of photography and the discussion of members photographic work. Each month members' are invited to bring along digital images or videos for review, that are either based on a set subject or are general interest images or both.

The technical part of the July session will cover overcoming difficult lighting conditions by taking multiple photographs of the subject using different camera setting for each image. A process known as bracketing.

With this in mind there will be a photoshoot on the 30th June 2020 at Smiths Bush. This should give us an opportunity to experiment with bracketed photography. We will meet at the Takapuna Cricket Club carpark in Northcote Road at 10.00 am

The image display theme for July will be bracketing. As always the set topic isn't compulsory you may bring along any photos that you would like to display. Images limited to ten per person.

Tips and Tricks : Ian Handricks

A tutorial and discussion forum where you can ask questions and get answers and also learn tips and tricks for a wide range of computer/ipad/iphone/laptop situations. Ian will endeavour to provide solutions for your questions and will introduce you to a bevy of useful tips, shortcuts, hidden features, useful tools, actions and ways to achieve results on your computer and technology devices. Each session, Ian will provide you with a hot list of new ideas, tips and tricks to explore and use.

Travel Tips : Glen Plaistowe

For anyone interested in travelling or seeing and hearing about other people's different travels both within New Zealand and overseas. We will share advice, tips to make you a more savvy traveller and, through sharing one another's photos and stories, learn about different places, their cultures, history and customs.

Wikipedia : Ian Handricks

Wikipedia is a multilingual online encyclopedia created and maintained as an open collaboration project by a community of volunteer editors. It is the largest and most popular general reference work on the World Wide Web. It is also one of the 20 most popular websites and it features free content and no commercial ads. Ian will teach us how to use it and introduce some of the many features, tricks and tips to get the most out of the website.

Marion's Tips**Microsoft Teams is getting this huge upgrade to take on Zoom**

Zoom has charged into the lead as the best video conferencing apps this year, but the company has had plenty of bumps along the way and Microsoft is now narrowing the gap with Teams. While Zoom is finally addressing one of its most serious security concerns, Microsoft Teams is looking to shore up one of its biggest feature deficits by vastly expanding the number of simultaneous video callers that it supports. Microsoft says, 'We intend to compete and win'

<https://www.laptopmag.com/news/microsoft-teams-is-getting-this-huge-upgrade-to-take-on-zoom>

Tech Home Help

- Independent pre-purchase technical advice
- Installing and configuring your new PC, printer or device

Rowan Cammell, Personal Computer Service, Ph 027 266 8941 rapid.start@xtra.co.nz

In some respects our club could be termed an essential service – perhaps of a different type but essential nevertheless. We are not of an age where we were taught computing at school, and many had no connection with computers at work but how good was it to be able to connect with family with our computers and cell phones, to search Google, to get online books from the library and the dozens and dozens of other conveniences that our computers allowed us to access during lockdown.

Now we have not been subjected to the exigencies of wartime conditions and war did not for the most part require isolation but we did have to cope with restrictions of a very different sort we had not experienced previously. Without all of the benefits of the internet, life would have been a lot tougher, particularly for those living alone.

The point of this: Recently when unable to sleep (for no particular reason) I turned on the radio during a talkback session. An obviously quite elderly woman was explaining to the host how she had needed to buy a new phone which was duly delivered and had to set it up herself due to the isolation (I don't think it was a cellphone but some sort of sophisticated landline, with visuals). The Host asked her how she knew to do all that and she said, "oh SeniorNet". She went on to say how wonderful SeniorNet was, how she had learned so much, how the Tutors had been wonderfully helpful and patient and finally how sad she was that her local SeniorNet had to close down due to costs and lack of people willing to help.

You know where this is going! We have elections coming up in August, my time in the chair finishes then, as we have a two year limit built into our constitution (there can be exceptions), our Secretary is unable to continue in that role, although our Membership Secretary has offered to do both if necessary, but we very much need members to offer their skills for the committee. It is not just a case of being "on the committee" there are "portfolios" on offer but they are not arduous roles. There is a meeting once a month and some ancillary tasks, but again I stress it is all done in a relaxed and co-operative atmosphere. Please don't read and move on

leaving it to someone else. You all have skills of various types, we ask give it some serious consideration and contact me or another committee member to discuss. Talking to us is not necessarily committing straight away.

If we don't get some help those that are already committing time and effort may decide that too much is being spread amongst too few and our club will also disappear. That would be a great shame as apart from learning we offer a sociable element and we have helped many members over a 24 year history and can continue to do so but only with your help.

15. India
16. Canada
17. Mexico
18. New Zealand

Moved that Clause 6.7 be inserted as follows:-

The register of members is confidential to the members of the committee (including the editor, if not a member of the committee), acting in their role as such and is not to be used for any other purpose in accordance with the Privacy Act. On leaving their role, the copy held by them is to be deleted.

Tutors may be supplied with all or part of the register of members subject to such rules as the committee may, in their absolute discretion determine, under the same principles as above.

Where provided under any relevant Act of Parliament, members may view the register of members, but under no circumstances may they take a copy, nor make any notes of information contained therein, in accordance with the Privacy Act. This applies to any copy which may be held by the Registrar of Incorporated Societies.

Moved by.....Peter Patten.....

Seconded by.....Patricia Lough.....

EXPLANATION.

It was determined by the committee some years ago that the above rule should apply and while the matter is effectively written into our Constitution already it was felt that it needed further amplification.

If you wish to consult our club Constitution it is available on our website, go to:
About – Join and scroll down and on the right hand side there is a link to our Constitution.

If you cannot attend and wish to vote please use the Proxy form below.

SENIOR NET (NORTH SHORE) INCORPORATED FORM OF PROXY

I....., being a financial member of Senior Net (North Shore) Incorporated, (SN), hereby appoint, failing which,....., failing which,..... as my proxy to vote on my behalf at the Annual/Special General Meeting of SN to be held on (specify date) or any adjournment thereof, subject to any special conditions noted below. Specific directions as to voting:-

.....
Date issued.....

Notes:- The appointee must be a financial member of SN at the date of the meeting &/or any adjournment thereof. If there are no specific directions above, the appointee can vote on all motions, otherwise, only on the topic(s) specified.

Members should keep in mind that, while they may direct the appointee to vote in a specific way on any topic, it could well be that discussion at the meeting may have changed the member's view on any topic, had the member been present. For this reason, it is recommended that the member appoints the chairperson of the meeting to vote according to his/her discretion, in the best interests of the all of the members of SeniorNet North Shore Inc.

It will be great to meet one another again and swap stories about the Great Lock Down.
We have two Speakers for this meeting.

First up is Peter Burrridge and the title of his talk is :

"Fingerprints- fingerprint consultant, about genetics (includes DNA aspects), history and crime."

Peter is a retired Senior Sergeant and Principal Fingerprint Officer and used to be the O/c Auckland Regional Fingerprint Section (that included SOC and other operational staff members). Has worked NZP as Uniform Branch Constable from 1963 - 66 in Wellington District, then to Central Africa and served with the British South Africa Police, UB, CID and Forensic Fp and Scenes of Crime, rejoined NZP

in 1975 and retired 20 years ago Consultant (together with fellow retired experts) with Fingerprint & Forensic Services Ltd., in this work ever since.

Secondly, we are very fortunate to have our own Cherry Parker, who despite being very busy with training staff for the forthcoming election day, is taking this opportunity to explain to us :

Behind the scenes on Election Day – nothing political – only an interesting and intriguing insight as to how it is all put together.

On Election day you get your voting paper, put a tick on each side of the paper and place the ballot paper into a ballot box. Five minutes at the most.

But what happens behind the scenes? How do the staff get there? How they know what to do? How come the voting papers are there waiting for you? How do they get counted? What figures are on the tv screens at 7pm?

A look behind the scenes from someone who has worked in many roles for the Electoral Commission in delivering elections for half a century!

Nothing political - only a lot of interesting information that will make you always look at elections very differently.

HAVE OUR SAY is a project funded by the Auckland Medical Research Foundation that will collect the views and experiences of New Zealanders aged 70+ regarding Covid-19 and lockdown (<https://haveoursay.org>) People over 70 were identified as most vulnerable to the virus, but were characterised by the media as passive and in need of protection. Very little was heard about how people in this age group felt about the pandemic and lockdown. It is vitally important these voices are heard to inform future pandemic responses.

The Project invites those 70 and over to write a letter to share their experience of lockdown and other aspects of Covid-19. All letters (with the letter-writer's permission) will become part of a permanent archive at the Auckland Museum. This will be an important historical record as well as a resource for informing future responses to pandemics by the government and media.

To write a letter now online, go to: https://auckland.au1.qualtrics.com/jfe/form/SV_bl4012ayXtru4gl

You may write your letter in the language you feel most comfortable communicating in. It does not have to be English. If you prefer, you may send an audio or video file, if that is a better way for you to communicate your thoughts.

The more letters collected, the more weight the project will have in terms of informing government responses to future pandemics and the richer the historical archive will be.

The project has received ethical approval from the University of Auckland Human Participants Ethics Committee.

Plane Park

Where oh where have all the planes gone?

Some \$15 Billion worth of them are here, holed up in the desert near Alice Springs. Will they ever fly again?

Data from analysts Cirium puts the number of grounded aircraft around the world currently at 16,100 - a total of 61 per cent of the world's passenger jets.

NEW AND INTERESTING TUTOR SESSIONS

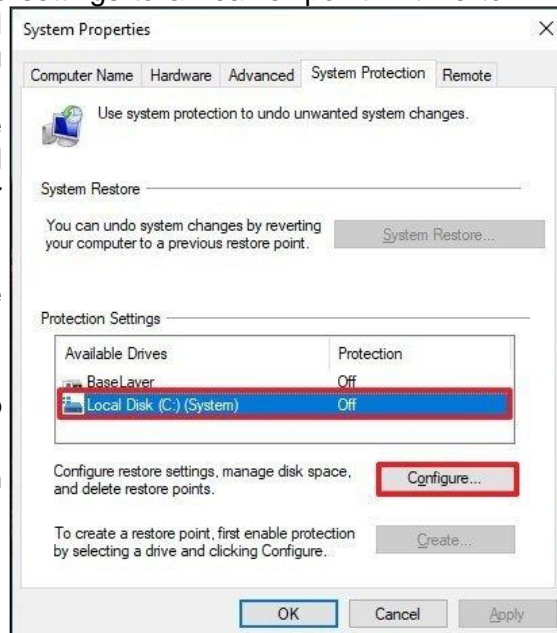

July, 2020

Session	Description	Tutor	Date	Time
Travel Advice	Travel Memories has emerged from recent travel restrictions. We will actively explore travel options in our own backyard and expand to other countries as we can. There will be time for presentations and memories of other people's experiences.	Glen Plaistowe	23 July 2020	10.00am
Ask Me How	Expand your understanding of your devices be it Apple or Android. For the first 30 minutes we have a special topic - this month it is Real Me - how to join up and benefit from Government websites. Then on to general questions. No need to book - just come along. \$5.	Toby Malcolm	28 July 2020	10:00am
Ask A Tutor	These are run twice a month with several Tutors available for one on one assistance. Please refer to our schedule for contact information. Must Book \$5.	Organisers: Barbara Anderson & Glen Plaistowe	See Schedule - Thursday 9 and Wednesday 15 July.	1.00pm
Wikipedia Special.	Explore the benefits of Wikipedia - learn all that it has to offer, there is so much available to us on this huge online encyclopedia.	Ian Handricks	8 July 2020	1.00pm
Card Group	New Session - our first session this month. Don't forget to register with Campbell Stanford. For beginners as well as card sharps. Must Book \$5.	Campbell Stanford	23 July 2020	1.00pm

On Windows 10, System Restore is a feature designed to create a snapshot of your device and save its working state as a "restore point" when system changes are detected. In the event of a critical problem after installing an update, driver, or app, or after modifying system settings incorrectly using the Registry or another tool, you can use a restore point to revert your device settings to an earlier point in time to fix the problem without losing your files. This feature is very useful when you are trying new software or diagnose problem as you can use restore point to restore system back to previous state. Although this is a handy troubleshooting tool, there's one caveat: For some odd reason, System Restore comes disabled by default, which means that you must enable it before you or Windows 10 can create restore points.

System Restore isn't enabled by default, but you can configure the feature with these steps:

- Open **Start**.
- Search for **Create a restore point**, and click the top result to open the System Properties experience.
- Under the "Protection Settings" section, select the main "System" drive, and click the **Configure** button.
- Select the **Turn on system protection** option.
- Click the **Apply** button.
- Click the **OK** button.

Once you complete these steps, Windows 10 will create a restore point automatically when applying a new update or when specific system changes are made.

System Restore isn't a feature that you can enable globally. It's only available for system drives (the one that has the OS installed on it).

Quick tip: Windows 10 can manage the space automatically, but under the "Disk Space Usage" section, you can also use the slider to specify the maximum amount of storage to reserve for System Restore. Ideally at least 10% of your disk free space.

Need help with computers?

Tekzone can offer you:

- * Genuine advice on what hardware and software is best for you
- * Top quality components from reputable companies
- * Pick up & set up anywhere in the Auckland metropolitan area
- * Transfer of files to your new computer

- * Personal help at your office or home, any time you need it
- * Broadband, Network & Wireless Setup
- * Free advice on all related matters
- * And, we charge only what we quote (no hidden extras)

Since many customers are still working on Windows 10 upgrade, this month we share a guide to fully prepare your PC ready for installing the latest Windows update.

1. Create a Recovery Drive for Windows Update

The first thing that you should do before Windows update is to create a Windows recovery drive on your PC. It can be a USB drive or a bootable CD/DVD.

The Windows recovery drive can help you quickly restore the Windows system to a secure state when you meet a problem while upgrading the Operating System.

2. Backup Your Data

Many users had experienced file loss or file deletion error while installing the new Windows 10 update. And the same problem occurred to the latest Windows 10 October 2018 update users again.

It's highly necessary to create a backup of essential data and valuable files on your PC to an external storage device before Windows 10 or other Windows OS update.

3. Make Sure the System Has Enough Disk Space

Sometimes, users may meet Windows update failure error when their system drive doesn't have enough space for installing new Windows OS.

To guarantee a smooth Windows update process, it also matters a lot to make sure that your system drive has enough disk space.

4. Decide Whether to Upgrade or Clean Install New Windows Update

Mostly, the latest cumulative Windows update will be available for you to check in Settings > Update & security > Windows Update.

If you check there, you'll be able to figure out how would like to install new Windows update - to install this update automatically or to download it from Microsoft website and perform a clean install.

If a new update is available in Windows Update, you can directly click Restart PC or Install Now to install the new OS.

If nothing shows up, you can either choose to wait for the mass rollout or download the new update from Microsoft and perform a clean install of Windows 10/8/7.

5. Keep Windows Product Key and Your Microsoft Account

When you find the right way about how to install a new Windows update on your PC, don't hurry.

1 hour Express SERVICE

available

We offer quality, fast, reliable, affordable and guaranteed repair service that is trusted by the leading NZ insurance companies.

- PC & MAC, Tablets

It's with great pleasure I introduce myself to New Zealand's superannuitants through this newsletter. I hope you and your friends and family are well and remain so as we progress through the alert levels of COVID-19.

Soon after I took up the role of Retirement Commissioner in February the country went into lockdown, so I've been coming to grips with my role from my home in Wellington. I was previously at public media funding body NZ On Air, where I spent 12 years as chief executive. Diversity and inclusion were central to my work there, so I understand that New Zealanders come from many different backgrounds and have many different needs as they prepare for retirement. I'm looking forward to working with my team at the Commission for Financial Capability (CFFC) to help improve New Zealanders' retirement through information, advocacy and collaboration.

Some of you may have made a submission to the [Review of Retirement Income Policies](#) last year.

I've now picked up the report and will continue to talk to Government about its 19 recommendations. Among them was that NZ Super should continue at its current settings, and younger generations should be reassured that this effective financial backstop will be there for them in the future. I believe that NZ Super is good value for money.

Our work in helping inform consumers about retirement village rules has continued through COVID-19 as we've used our website www.cffc.govt.nz to post guidelines for village operation at each alert level. There you can also find other helpful information we developed with the Retirement Villages Association earlier this year. The [Summary of Key Terms](#) clarifies the cost of moving into and living in a village, and the [Transfer to Care checklist](#) covers the procedure and cost of transferring to an aged care facility on the site of a village. The decision of whether to move into a village can be life-changing, and I'm pleased these guidelines will help consumers make the best choice for their circumstances.

It's a privilege to hold this role and I look forward to meeting with many of you in the coming months, maybe not just through Zoom either!

If you would like to raise any issues regarding retirement income or retirement villages, please don't hesitate to contact me at via office@ccfc.govt.nz

Marion's Tips

5G Conspiracy Theorists Are Now Targeting Engineers Directly

Ever since the pandemic began, there's been a blatant conspiracy theory circulating in the media that 5G and coronavirus are somehow linked. This is scarcely new — LTE and 3G both went through their own periods of being declared unsafe and harmful to humanity — but that minor detail contains no predictive power where conspiracy theorists are concerned. As James Vincent details, an increasingly unhinged fringe has begun targeting engineers directly rather than contenting themselves with setting 5G (and often, LTE) towers on fire. According to Mobile UK, there have been more than 200 documented instances of abuse towards telecoms engineers since March 30, with more than 90 arson attacks against mobile infrastructure.

How to Record the Screen on Your Windows PC or Mac

Here's how to capture your computer screen using the built-in tools on Windows and macOS or third-party screen-capture apps. Want to record the screen on your PC? Maybe you're a professional who needs to capture your screen for a presentation at work, a software developer generating a how-to video, or someone who wants to upload something fun to YouTube. Windows and macOS allow you to capture your screen activity thanks to built-in tools, though there are also many third-party screen-capture apps. Here's how to use all available tools.
